 WCPO-TV (Cincinnati), WHAS-TV (Louisville)

No Change in Democratic Presidential Contest in Kentucky -- Clinton Still 2:1 Atop Obama: In a Democratic Primary in Kentucky today, 04/29/08, three weeks until votes are counted, Hillary Clinton decisively defeats Barack Obama, 63% to 27%. In three SurveyUSA tracking polls over the past 30 days, there is no movement in the contest. Obama gains a little bit of ground in Greater Louisville, but loses an equivalent amount in other portions of the state.

Filtering: 1,600 state of KY adults were interviewed 04/26/08 through 04/28/08. Of them, 1,443 were registered to vote. Of them, 555 were determined by SurveyUSA to be likely to vote in the 05/20/08 closed Democratic Primary.

1 If the Democratic Primary for President of the United States were today, would you vote for...(names rotated) Hillary Clinton? Barack Obama? Or some other Democrat?

Statement of Methodology: The following statement conforms to the principles of disclosure of the National Council on Public Polls: How this poll was conducted: This SurveyUSA poll was conducted by telephone in the voice of a professional announcer. Respondent households were selected at random, using Random Digit Dialed (RDD) sample provided by Survey Sampling, of Fairfield CT. All respondents heard the questions asked identically. Within the report, you will find: the geography that was surveyed; the date(s) interviews were conducted and the news organization(s) that paid for the research. The number of respondents who answered each question and the margin of sampling error for each question are provided. Where necessary, responses were weighted according to age, gender, ethnic origin, geographical area and number of adults and number of voice telephone lines in the household, so that the sample would reflect the actual demographic proportions in the population, using most recent U.S. Census estimates. In theory, with the stated sample size, one can say with 95% certainty that the results would not vary by more than the stated margin of sampling error, in one direction or the other, had the entire universe of respondents been interviewed with complete accuracy. There are other possible sources of error in all surveys that may be more serious than theoretical calculations of sampling error. These include refusals to be interviewed, question wording and question order, weighting by demographic control data and the manner in which respondents are filtered (such as, determining who is a likely voter). It is difficult to quantify the errors that may result from these factors. Fieldwork for this survey was done by SurveyUSA of Verona, NJ.
