

# Results of SurveyUSA Election Poll #13301

Geography: Oklahoma

Data Collected: 02/02/2008 - 02/03/2008

Release Date: 02/04/2008

**Eve of OK GOP Primary -- Huckabee Challenges McCain for Sooner Delegates:** 24 hours till votes are counted in the Oklahoma Republican Primary, John McCain has a slight edge on Mike Huckabee, with Mitt Romney very much in the mix, according to SurveyUSA's final pre-primary tracking poll, conducted for KFOR-TV Oklahoma City. Compared to a SurveyUSA poll released last week, before Rudolph Giuliani withdrew from the contest, McCain is unchanged, at 37%, Huckabee is up 4 points, from 28% to 32%, and Romney is up 4 points, from 19% to 23%. In Eastern OK, McCain and Huckabee are tied. In Western OK, McCain leads by 8. Among Pro-Life voters, Huckabee leads by 12. Among Conservative voters, Huckabee leads by 8. Among those who attend religious services regularly, Huckabee leads by 6. But: Among Moderates, McCain leads by 31 points. Among Pro-Choice voters McCain leads Romney by 41 points.

**Filtering:** 1,900 state of OK adults were interviewed 02/02/08 and 02/03/08. All interviews completed before 5:30 pm CT kickoff of Super Bowl. Of the adults, 1,647 were registered to vote. Of them, 445 were determined by SurveyUSA to have already voted in the Primary, or to be likely to vote at the precinct on 02/05/08.

**1** If the Republican Primary for President of the United States were today, would you vote for ...(names rotated) Mike Huckabee? John McCain? Mitt Romney? Ron Paul? Or some other Republican?

Geography: Oklahoma

Data Collected: 02/02/2008 - 02/03/2008

Release Date: 02/04/2008

**Statement of Methodology:** The following statement conforms to the principles of disclosure of the National Council on Public Polls: How this poll was conducted: This SurveyUSA poll was conducted by telephone in the voice of a professional announcer. Respondent households were selected at random, using Random Digit Dialed (RDD) sample provided by Survey Sampling, of Fairfield CT. All respondents heard the questions asked identically. Within the report, you will find: the geography that was surveyed; the date(s) interviews were conducted and the news organization(s) that paid for the research. The number of respondents who answered each question and the margin of sampling error for each question are provided. Where necessary, responses were weighted according to age, gender, ethnic origin, geographical area and number of adults and number of voice telephone lines in the household, so that the sample would reflect the actual demographic proportions in the population, using most recent U.S. Census estimates. In theory, with the stated sample size, one can say with 95% certainty that the results would not vary by more than the stated margin of sampling error, in one direction or the other, had the entire universe of respondents been interviewed with complete accuracy. There are other possible sources of error in all surveys that may be more serious than theoretical calculations of sampling error. These include refusals to be interviewed, question wording and question order, weighting by demographic control data and the manner in which respondents are filtered (such as, determining who is a likely voter). It is difficult to quantify the errors that may result from these factors. Fieldwork for this survey was done by SurveyUSA of Verona, NJ.
