

Results of SurveyUSA Election Poll #14117

Geography: State of Washington
 Data Collected: 07/13/2008 - 07/15/2008
 Release Date: 07/16/2008

Sixteen Weeks Out, Obama Sixteen Points Atop McCain in Washington State: Democrat Barack Obama defeats Republican John McCain 55% to 39% in an election for President of the United States in Washington State today, 07/15/08, 111 days until the election, according to this latest SurveyUSA pre-election tracking poll conducted exclusively for KING-TV in Seattle and KATU-TV in Portland Oregon. There is little movement compared to an identical SurveyUSA poll released one month ago: Obama is down 1 point; McCain is flat. Obama continues to lead among men and women, young and old, among whites and minorities. 14% of Republicans cross-over to vote for Democrat Obama; 10% of Democrats cross-over to vote for Republican McCain. Independents break 4:3 for Obama. Obama leads by 29 points in Metro Seattle -- up from 19 points one month ago. Obama leads by 11 in Western Washington, down from 17 one month ago. A month ago, Obama led by 10 in Eastern Washington; today, McCain leads by 11. Among voters younger than Obama, Obama leads by 19, down from 24 last month. Among voters older than McCain, Obama leads by 24, up from 4 last month.

Filtering: SurveyUSA interviewed 900 Washington adults 07/13/08 through 07/15/08; of the adults, 806 identified themselves as being registered to vote in Washington state. Of the registered voters, 666 were determined by SurveyUSA to be likely to vote in the November general election. 37 of Washington's 39 counties vote exclusively by mail; ballots must be postmarked no later than Election Day, 11/04/08.

1 If you were filling out your ballot for President right now, would you vote for ... (choices rotated) Republican John McCain? Or, Democrat Barack Obama?

** Too few respondents of this type were interviewed for this data to be meaningful.

Statement of Methodology: The following statement conforms to the principles of disclosure of the National Council on Public Polls: How this poll was conducted: This SurveyUSA poll was conducted by telephone in the voice of a professional announcer. Respondent households were selected at random, using Random Digit Dialed (RDD) sample provided by Survey Sampling, of Fairfield CT. All respondents heard the questions asked identically. Within the report, you will find: the geography that was surveyed; the date(s) interviews were conducted and the news organization(s) that paid for the research. The number of respondents who answered each question and the margin of sampling error for each question are provided. Where necessary, responses were weighted according to age, gender, ethnic origin, geographical area and number of adults and number of voice telephone lines in the household, so that the sample would reflect the actual demographic proportions in the population, using most recent U.S. Census estimates. In theory, with the stated sample size, one can say with 95% certainty that the results would not vary by more than the stated margin of sampling error, in one direction or the other, had the entire universe of respondents been interviewed with complete accuracy. There are other possible sources of error in all surveys that may be more serious than theoretical calculations of sampling error. These include refusals to be interviewed, question wording and question order, weighting by demographic control data and the manner in which respondents are filtered (such as, determining who is a likely voter). It is difficult to quantify the errors that may result from these factors. Fieldwork for this survey was done by SurveyUSA of Verona, NJ.
